Bill/Ben -

Please find attached below a September 2009 fact sheet in PDF format for the Omega Chemical Superfund Site entitled, "EPA Issues Draft Remedial Investigation Report for Downgradient Plume at Omega Site". The United States Environmental Protection Agency (EPA) and two groups of potentially responsible parties (PRPs) have been conducting an investigation of the groundwater and soil contamination at the Omega Chemical Corporation Superfund Site (Omega Site) in Whittier, CA. The attached fact sheet summarizes the Draft Remedial Investigation (RI) for Operable Unit 2 (OU-2), which is defined as the area of contaminated groundwater downgradient of the former Omega Chemical facility. This area has been impacted by the release (via spills and leaks) of hazardous substances at the former Omega Chemical Corporation facility.

Fact sheet Omega09_09.pdf

The fact sheet also provides information on primary contaminants of concern at the Omega Site; site background; technical assistance program; site information repositories; and EPA staff contact information. Should your office receive questions from constituents regarding the Omega Chemical Superfund Site, you can direct them to the following two EPA contacts:

Jackie Lane, Community Involvement Coordinator

U.S. EPA Region 9 (SFD-6-3)

Direct: (415) 972-3236

Toll-free: (800) 231-3075

lane.jackie@epa.gov

Lynda Deschambault, Remedial Project Manager

U.S. EPA Region 9 (SFD-7-1)

Direct: (415) 947-4183

Toll-free: (800) 231-3075

deschambault.lynda@epa.gov

If you would like to arrange a conference call to discuss the Omega Chemical Superfund Site, please let me know and I would be happy to set that up. Also, please let me know if you have questions or need any additional information.

Regards,

Brent
